Dear Sir/Madam

Firstly, I hope you are keeping safe and well.

As I am sure you are aware our entire industry has faced several challenges regarding materials & component availability due to Brexit, COVID, and freight congestion issues. At the same time, we are in the fortunate position that there has been an increasing demand for our products, although the combination of these factors is having an impact on our ability to achieve our normal engine lead times. While I do not have specific details at this point it appears likely that lead times for our engines, particularly the models built in Peterborough and Wuxi, will experience an increase in the short term with current ex-factory lead times in excess 30 weeks for new orders. Specific model delivery dates can be confirmed upon request.

We are working closely with Perkins to align our requirements with what can be achieved given the supply chain constraints and will communicate the latest availability once this is confirmed.

Thank you for your understanding and support during this challenging period.

If you have any questions, or would like further clarification, please do not hesitate to me.

Kind Regards

Jamie Gibbon  
EP Sales Representative.
